

# MOHAMMED AMANSOUR

## Electronics, Embedded Systems, Automation, IT

Bachelor of Science in Electrical Engineering, Co-Founder of GryLab

🌐 [linkedin.com/in/mdamansour](https://www.linkedin.com/in/mdamansour) | 🌐 [amansour.me](https://amansour.me)

✉️ [m@amansour.me](mailto:m@amansour.me) - 📞 (+212) 708 99 28 70 - 📍 Tangier, Morocco

### TECHNICAL SKILLS

- **Programming:** Python, C/C++, Ladder, Assembly, LaTeX, Kotlin
- **Software/Tools:** MATLAB, Catia, Simulink, Multisim, AutoCAD, VS, PSIM, LTspice, Android Studio
- **OS:** Linux, Android, Windows
- **Collaboration:** Git, GitHub
- **Hardware:** Microcontrollers, PIC, Arduino, Raspberry Pi, STM32
- **Databases:** MySQL, phpMyAdmin
- **Web Development:** HTML, PHP, JS, CSS, WordPress, XML

### LANGUAGES

- **Arabic:** Native
- **English:** Fluent
- **French:** Advanced (DELF B2)
- **Spanish:** Intermediate
- **German:** Beginner

### CERTIFICATIONS

- **EY:** Green Skills Passport
- **Huawei:** Next-Gen Cyber Security
- **Microsoft:** Implement RAG
- **LinkedIn:** PLC Program Flow

### VOLUNTEERING

- **Amansour Blog:** Education
- **Yallah Nette3awnou:** Food relief

### SOFT SKILLS

Problem-Solving, Collaboration, Communication, Time Mgmt, Adaptability, Critical Thinking

### HOBBIES

Learning languages, Chess, Running, Weight-lifting, Writing, Reading

### PROFESSIONAL SUMMARY

Recent B.Sc. in Electrical Engineering with a focus on embedded systems and automation. Experienced in designing & implementing real-time systems using microcontrollers, PLCs, and programming in C/C++ and Python. Seeking entry-level roles to develop innovative solutions in embedded systems and automation.

### EDUCATION

**B.Sc. in Electrical Engineering & Industrial Systems** 2022-2025

**Faculty of Science and Technology (FST), Tangier**

Key courses: Electronics, Solid Mechanics, Embedded Sys, Telecom, CAD

**High School Diploma in Electrical Sciences & Technologies** 2019-2022

**Technical High School Moulay Youssef, Tangier**

Key courses: PLCs, PCB Design, Tech Drawing, Transformers, Programming

### PROFESSIONAL EXPERIENCE

**Co-Founder, Mobile App Development | GryLab, Tangier** Apr 2025 - Ongoing

- Co-founded a tech start-up specializing in high-performance, single function mobile apps with minimalist design and optimization for efficiency.

- Tools: Flutter, React Native, Python, AWS, Git, GitHub, Android Studio.

**Embedded Systems Engineering | Aptiv, Tangier** Apr-Jul 2025 (3 months)

- Designed, Implemented and Tested a real-time cable identification system with embedded  $\mu$ CU, I2C serial communication & GUI interface.

- Tools: Proteus, Python, Ultiboard, C++, Arduino Mega, Integrated Circuits.

**Automation Engineering | Tanger MED, Ksar Sghir** Sep 2024 (1 month)

- Configured an anti-collision safety system with SICK real-time laser sensors & SIEMENS PLCs for detection & crane speed adjustment.

- Tools: SOPAS ET, Simatic Step 7, MATLAB, Ladder Logic.

**Full-Stack Development | Cloud Marketing Hub, Tangier** Aug 2024 (1 month)

- Created a school management app for tracking payments, attendance, configuring accounts, database management.

- Tools: WampServer, MySQL, phpMyAdmin, VS, PHP, HTML, CSS, JS, Bootstrap.

### ACADEMIC PROJECTS

#### Software-Defined Multimeter

- Built an Arduino-based multimeter for electrical signals measurement in real time throw serial monitor (Voltage, Current, Impedance).

- Tools: C/C++, Arduino IDE, Code::Blocks.

#### Traffic Lights Control System

- Designed, simulated, & implemented an automated traffic light system using flip-flops & logic gates to optimize cars & pedestrians flow.

- Tools: Arduino IDE, C, Proteus, Data sheets.

#### Wien Oscillator & Filters

- Evaluated the phase shift and frequency response of oscillator circuits using lab equipment to optimize signal stability and performance.

- Tools: Function generators, oscilloscopes, harmonic distortion analyzers
