

MOHAMMED AMANSOUR

Electronics, Embedded Systems, V&V

[linkedin.com/in/mdamansour](https://www.linkedin.com/in/mdamansour) | github.com/mdamansour | amansour.me/blog

m@amansour.me - (+212) 708 99 28 70 - Fez, Morocco

TECHNICAL SKILLS

- **Programming:** Python, C/C++, Java, Assembly, LaTeX, VHDL
- **Software:** MATLAB, Simulink, PSIM, Multisim, Cadence Virtuoso, Quartus, ModelSim, VS code
- **OS:** Linux, Xenomai, Windows
- **Versioning:** Git, GitHub, GitLab
- **Hardware:** DSP, Arduino, STM32, Raspberry Pi, FOX G20, FPGA
- **Databases:** MySQL, phpMyAdmin
- **Web:** HTML, PHP, JS, CSS, XML, WordPress

LANGUAGES

- **Arabic:** Native
- **English:** Fluent
- **French:** Advanced
- **Spanish:** Intermediate
- **German:** Beginner

CERTIFICATIONS

- **French Institut:** DELF B2
- **EF SET:** English C2
- **Huawei:** Next-Gen Cyber Security
- **MathWorks:** MATLAB Onramp

VOLUNTEERING

- **Amansour Blog:** Education
- **Yallah Nette3awnou:** Food relief

SOFT SKILLS

- Systems Thinking
- Technical Communication
- Independent Upskilling

HOBBIES

- Language Exchange
- Meeting International People
- Teaching engineering concepts
- Playing Chess

SUMMARY

Embedded Systems Engineer with experience in the development and validation of complex embedded systems within Agile and V-cycle environments. My technical background has strengthened my ability to manage complexity and deliver reliable solutions. I aspire to complement my engineering expertise with an MBA to develop the strategic and leadership skills needed to lead technology-driven organizations.

EDUCATION

Master in Electrical Engineering & Embedded Systems 9-2025 | 6-2027
Sidi Mohamed Ben Abdellah University – Fez, Morocco

- Designed, simulated, and validated integrated circuits in *Cadence Virtuoso*.
- Built and verified *FPGA* digital systems in *VHDL* using *Quartus II* and *ModelSim*.
- Deployed a dual-kernel *RTOS* based on *Linux* and *Xenomai* using *Ipipe*.

Bachelor in Electrical Engineering & Industrial Systems 9-2024 | 6-2025
Abdelmalek Essaâdi University – Tangier, Morocco

- Designed a traffic-light controller using *logic gates*, and *sequential logic*.
- Built and prototyped a sun-tracking system using *Arduino* and *light sensors*.

Associate in Electrical & Mechanical Engineering 9-2022 | 6-2024
Abdelmalek Essaâdi University – Tangier, Morocco

- Modeled and assembled a functional automotive piston using *CATIA*.
- Prototyped an *MCU*-based multimeter to measure & display electrical parameters.

PROFESSIONAL EXPERIENCE

Embedded Systems Engineer (Apprentice) | ALTEN, Morocco 4-2026 | Present

- Developing and executing HIL test strategies for automotive embedded systems.
- Developed a real-time tractors suspension model with an interactive dashboard.
Tools: C, Python, Java, TCP/IP, Scrum, V-Cycle, CANoe, CANalyzer, HIL, GitLab.

Mobile App Developer (Co-Founder) | GryLab, Morocco 7-2025 | Present

- Developed and launched the first beta version of a workout-tracking application.
- Launched grylab.com and established the startup's core branding and operations.
Tools: Kotlin, Git, GitHub, Android Studio, WordPress, Google Play Console.

Embedded Systems Engineer (Intern) | APTIV, Morocco 4-2025 | 7-2025

- Designed and implemented a real-time embedded system on an MCU with HMI.
Tools: Proteus, Python, C++, I2C, Arduino Mega, Datasheets.

Automation Engineer (Intern) | SPIA Maroc, Morocco 7-2024 | 8-2024

- Configured an anti-collision safety system with real-time laser sensors and PLCs.
Tools: SOPAS ET, Simatic Step 7, MATLAB, Ladder Logic.

PERSONAL PROJECTS

- Developed an **ADAS** lane detection system in **MATLAB** using **Computer Vision**.
- Developed online e-commerce websites using **WordPress** and **WooCommerce**.
- Developed a **terminal-based (CLI)** chess game in **C**.
