✉️ m@amansour.me - 📞 (+212) 708 99 28 70 - 📍 Tangier, Morocco

TECHNICAL SKILLS

- **Programming:** Python, C/C++, Ladder, Assembly, LaTeX, Kotlin
- **Software/Tools:** MATLAB, Catia, Simulink, Multisim, AutoCAD, VS, PSIM, LTspice, Android Studio
- **OS:** Linux, Android, Windows
- **Collaboration:** Git, GitHub
- **Hardware:** Microcontrollers, PIC, Arduino, Raspberry Pi, STM32
- **Databases:** MySQL, XAMPP
- **Web Development:** HTML, PHP, JS, CSS, WordPress, XML

LANGUAGES

- **Arabic:** Native
- **English:** Fluent
- **French:** Advanced (DELF B2)
- **Spanish:** Intermediate
- **German:** Beginner

CERTIFICATIONS

- **EY:** Green Skills Passport
- **Huawei:** Next-Gen Cyber Security
- **Microsoft:** Implement RAG
- **LinkedIn:** PLC Program Flow

VOLUNTEERING

- **Amansour Blog:** Education
- **Yallah Nette3awnou:** Food relief

SOFT SKILLS

Problem-Solving, Collaboration, Communication, Time Mgmt, Adaptability, Critical Thinking

HOBBIES

Learning languages, Chess, Running, Weight-lifting, Writing, Reading

PROFESSIONAL SUMMARY

Holder of a Bachelors in Electrical Engineering and Industrial Systems, I wish to join the Master of Sciences and Techniques in Electrical Engineering and Embedded Systems at the Faculty of Sciences and Techniques of Fez for 2025/2026. Passionate about technological innovation, I aim to leverage my skills in electronics, embedded systems and automation to meet new academic and technical challenges.

My academic path is complemented by industrial experience at Aptiv, where my final year project on automating manual declarations enhanced my expertise in electrical and connected solutions, while strengthening both my technical skills and teamwork.

EDUCATION

B.Sc. in Electrical Engineering & Industrial Systems 2022-2025

Faculty of Science and Technology (FST), Tangier

Key courses: Electronics, Solid Mechanics, Embedded Sys, Telecom, CAD

High School Diploma in Electrical Sciences & Technologies 2019-2022

Technical High School Moulay Youssef, Tangier

Key courses: PLCs, PCB Design, Tech Drawing, Transformers, Programming

PROFESSIONAL EXPERIENCE

Co-Founder, Mobile App Development | GryLab, Tangier Apr 2025 - Ongoing

- Co-founded a tech start-up specializing in high-performance, single function mobile apps with minimalist design and optimization for efficiency.

- Tools: Jetpack Compose, Kotlin, Git, GitHub, Android Studio.

Auto-Identification Embedded System | Aptiv, Tangier Apr-Jul 2025 (3 months)

- Designed, Implemented and Tested a real-time cable identification system with embedded μ CU, I2C serial communication, EEPROMs, GPIOs & GUI interface.

- Tools: Proteus, Python, Ultiboard, C++, Arduino Mega, Integrated Circuits.

Anti-Collision System | Tanger MED, Ksar Sghir Sep 2024 (1 month)

- Configured an anti-collision safety system with SICK real-time laser sensors & SIEMENS PLCs for collisions detection & crane speed adjustment.

- Tools: SOPAS ET, Simatic Step 7, Ladder Logic.

Full-Stack School Management System | CMH, Tangier Aug 2024 (1 month)

- Created a school management full-stack application for tracking payments, attendance, configuring accounts, database management.

- Tools: WampServer, MySQL, phpMyAdmin, VS, PHP, HTML, CSS, JS, Bootstrap.

ACADEMIC PROJECTS

Software-Defined Multimeter

- Built an Arduino-based multimeter for electrical signals measurement in real time throw serial monitor (Voltage, Current, Impedance).

- Tools: C/C++, Arduino IDE, Code::Blocks.

Traffic Lights Control System

- Designed, simulated, & implemented an automated traffic light system using flip-flops & logic gates to optimize cars & pedestrians flow.

- Tools: Arduino IDE, C/C++, Proteus, Data sheets.
